

Palmers Gardenworld Remuera DELIVERS *the* UNEXPECTED

“

Palmers transformed our swimming pool area into an oasis. When you enter our swimming pool area you naturally relax and feel connected with nature, it all works beautifully. Our friends go WOW!! when they see the transformation!! The children are counting the sleeps until daylight saving and warmer weather so they can swim and play with their friends. Jonathan's original ideas using exotic Mexican grass trees in amazing Atlantis urns from their onsite collection in Remuera has really added X factor to our property. Careful listening, a great concept and the well planned execution far exceeded our expectation. We had no idea Palmers had the knowledge & expertise to deliver such a fantastic high quality result. Great work! ”

“Earlier this year we had renovations done to our pool area and surrounds. As we couldn't find someone to oversee the whole project we employed a variety of tradesmen to complete their specialised field on the job. The result was a job which stretched out far too long and was incomplete. With the job in a state of limbo we were fortunate enough to be recommended the team at Palmers Remuera. We never realised the scope of the services they provide, and wish we had met them before we had started to plan this project. We asked them to come to compile a planting plan for the pool surrounds and were delighted with the approach they took and the resulting plan. They have an extremely holistic process when planning a job and they asked a lot of relevant questions, listening to everything we desired.

They came back with a concept which far exceeded our expectations. Not only did they have a planting plan which met all of our criteria, they suggested a number of tiling, drainage, planting, fencing and structural features such as our pergola, which turned our average project into an oasis. We agreed with all of the suggestions they put forward and they managed every step of the process in house using

their skilled and dedicated staff. Work was professional and we were equally impressed with the manner in which they approached implementation of the plan. We were kept informed of progress through each phase, and forewarned of any disruptions which may impact on us of the project. Their staff were respectful and considerate in the way they worked around our home and neighbourhood.

The job was completed within the time line they committed to, and the outcome was an area we are proud of and want to share with our family and friends. Awesome!!

Following on from this job we have recommended Jonathan and his team to a number of our friends, and will be involving their creative genius in the plans we have for our upcoming house renovations. We have also employed their expertise to provide the finishing touches to our new business premises. We would not hesitate to recommend them to anyone who is looking for a company which can assess a project and deliver a unique finished product which exceeds expectations.”
